

UNITED NATIONS CONFERENCE
ON THE APPLICATION OF SCIENCE AND TECHNOLOGY
FOR THE BENEFIT OF THE LESS DEVELOPED AREAS

E/CONF.39/D/104
SUMMARY

22 Oct.1962

ORIGINAL : ENGLISH

SUMMARY

Agenda Item: D.12.1

United Kingdom

**THE IMPLEMENTATION OF PLANS
FOR THE DEVELOPMENT OF THE CHEMICAL INDUSTRY**

By D.C. LENNON, Director,
Humphreys and Glasgow Ltd.,
London

Papers have been contributed to the United Nations Conference on the Application of Science and Technology for the Benefit of the Less Developed Areas as working papers for that Conference. They are published as presented by the contributors, and the contents and the views expressed are those of the contributors. (See notes overleaf.)

NOTES

1. Papers selected for inclusion in General Sessions will be available at the Conference in the following official languages of the United Nations: English, French, Russian and Spanish.
2. Papers selected for inclusion in Specialized Sessions will be available at the Conference in only one of the above official languages.
3. Summaries of all papers, as submitted by contributors, will be available at the Conference in the following official languages of the United Nations: English, French, Russian and Spanish.
4. Papers and summaries will not be available for general distribution in advance of the Conference. They will be published in advance in limited quantities only for the use of delegations of participating governments and of other authorized participants. Post-Conference publication and general distribution of the Conference Proceedings will follow United Nations practices as laid down by the United Nations Publications Board.

The Implementation of Plans for the Development of the Chemical Industry

by D. C. Lennon, Director, Humphreys & Glasgow Ltd, London

The paper discusses the steps which an underdeveloped country might pursue towards the establishment of a chemical industry; the type of initial survey which can be made, together with the information which is required for such a survey; and the results which can be expected. Reference is made to the organizations which are capable of satisfactorily completing a survey of this type.

Following the initial survey the Government organization required to implement its recommendations is discussed, together with the incentives which may be offered to private chemical companies to further the development of the chemical industry in the private sector.

The typical cost components of chemical plants are shown, together with the information on programming of the engineering and construction and the financial commitments throughout the work.

The preparation of the invitations to tender, the contractual and credit conditions which apply are briefly reviewed, together with the final evaluation of the tenders when they are received.

The Importance of Data for the Development of the Chemical Industry

by E. J. Egan, Director, Research & Development, ICI, Ltd.

The chemical industry is a major contributor to the national economy. It is a highly complex industry, and the development of new products and processes is a continuous process. The importance of data for the development of the chemical industry is therefore of paramount importance. Data is the foundation upon which the chemical industry is built. It is the basis for the development of new products and processes, and it is the key to the success of the chemical industry. Data is also the basis for the development of new technologies, and it is the key to the success of the chemical industry. Data is the foundation upon which the chemical industry is built. It is the basis for the development of new products and processes, and it is the key to the success of the chemical industry. Data is also the basis for the development of new technologies, and it is the key to the success of the chemical industry.
